# Detroit Electric

## Doubled output for 1916 reduces prices as low as 1975

As this town has electricity it is a practical Detroit Electric car town. Long stretches of paved streets are not a necessity for this car with its great power and remarkably easy riding qualities. Detroit Electric owners have demonstrated that it is just as good for interurban motoring as it is for driving about town.

August 15 we reduce the price \$600 to \$725 per car

Remember—these are the same high quality cars as our 1915 models plus a score or more of 1916 refinements. Even while lowering the price, we bettered the car. In the 1916 Detroit Electric, you will find we believe—the top place car of its type.

Ve urge you to match it—if you can in elegance,
cuality, utility for value in the entire closed car field—gasoline or electric. This price reduction is possible only because of doubled output.

You get these savings

Our doubled production leads to many economies in all overhead expenses, in purchasing, in advertising, in sales cost, in engineering. # All the savings effected by our larger operations we hand on to youand take our benefit from doubled volume,

Here are the 1916 prices

Model 61 4-Passenger Brougham (Formerly \$2,500) - Now \$1,975 Model 60 5-Pass. Dupler Drive Brougham (Formarky \$3,000) - Now \$2,275 Pass. Rear Drive Brougham 16 St. 225 Model 58 5-Pass. Front Drive Brougham (Formerly \$2,950) - Now \$2,250
